

The definite marker -ake in the Trans-Zab North-Eastern Neo-Aramaic: its origin and convergence with Iranian

Masoud Mohammadirad

University of Cambridge

Geoffrey Khan

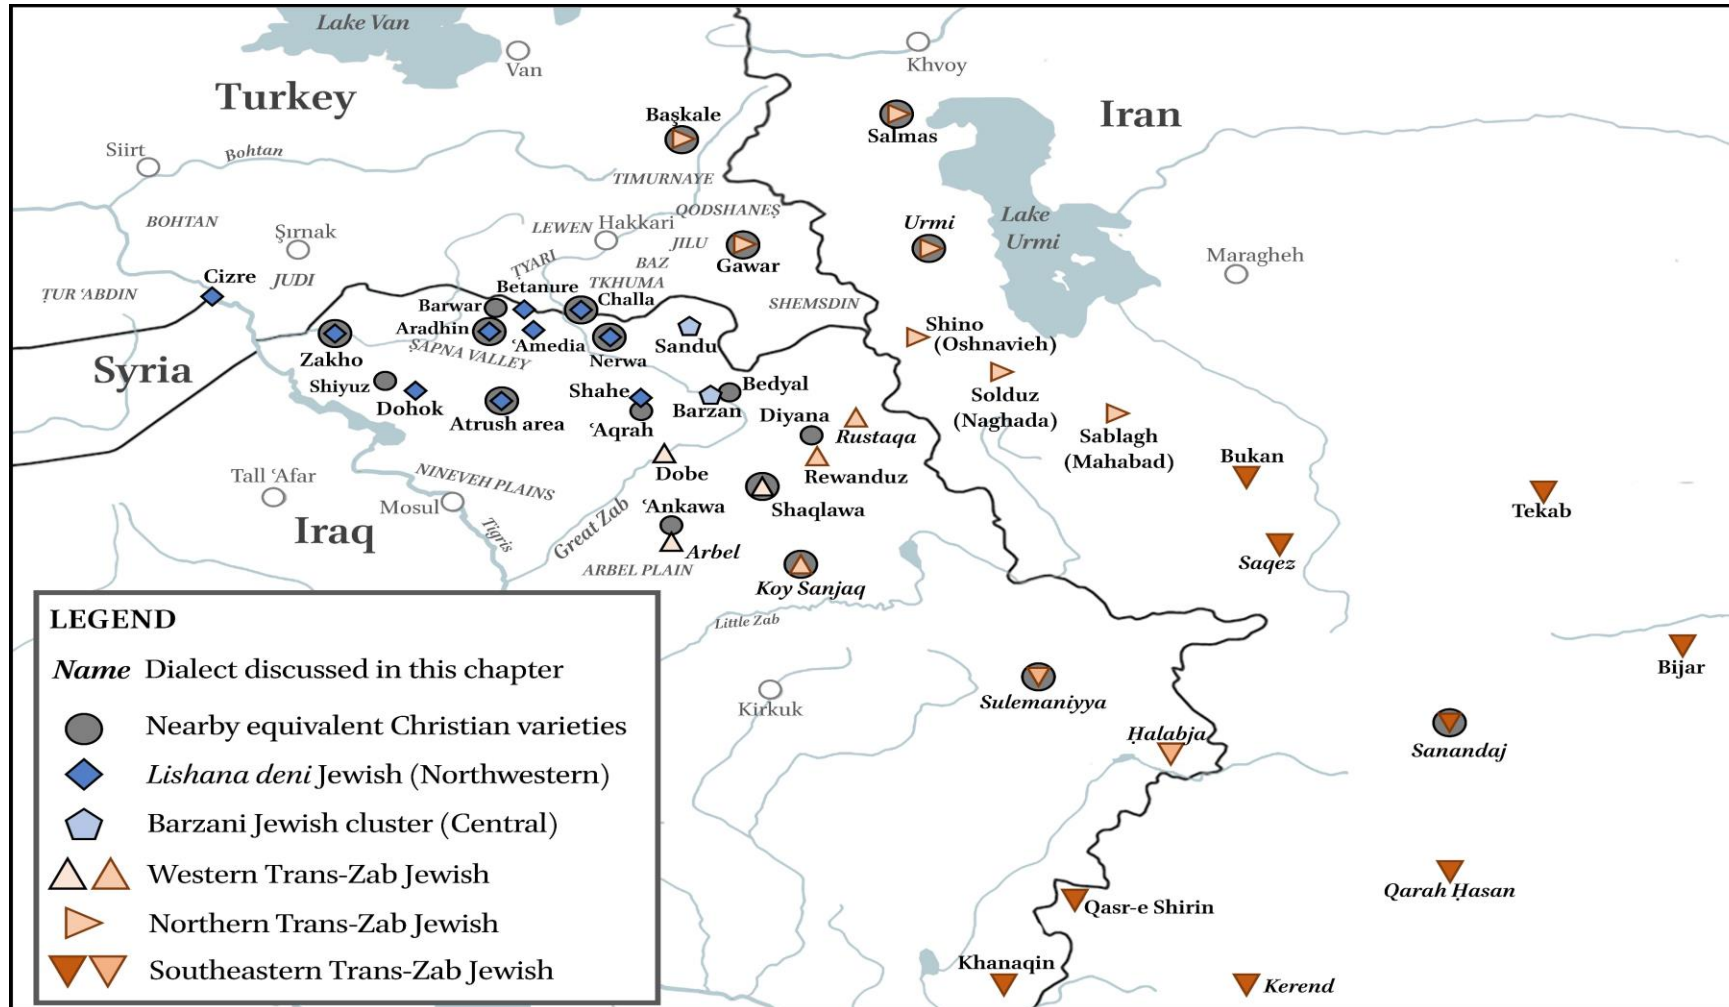

University of Cambridge

Workshop on Definiteness Marking in Iranian Languages, Uppsala 3rd, 7th June 2022

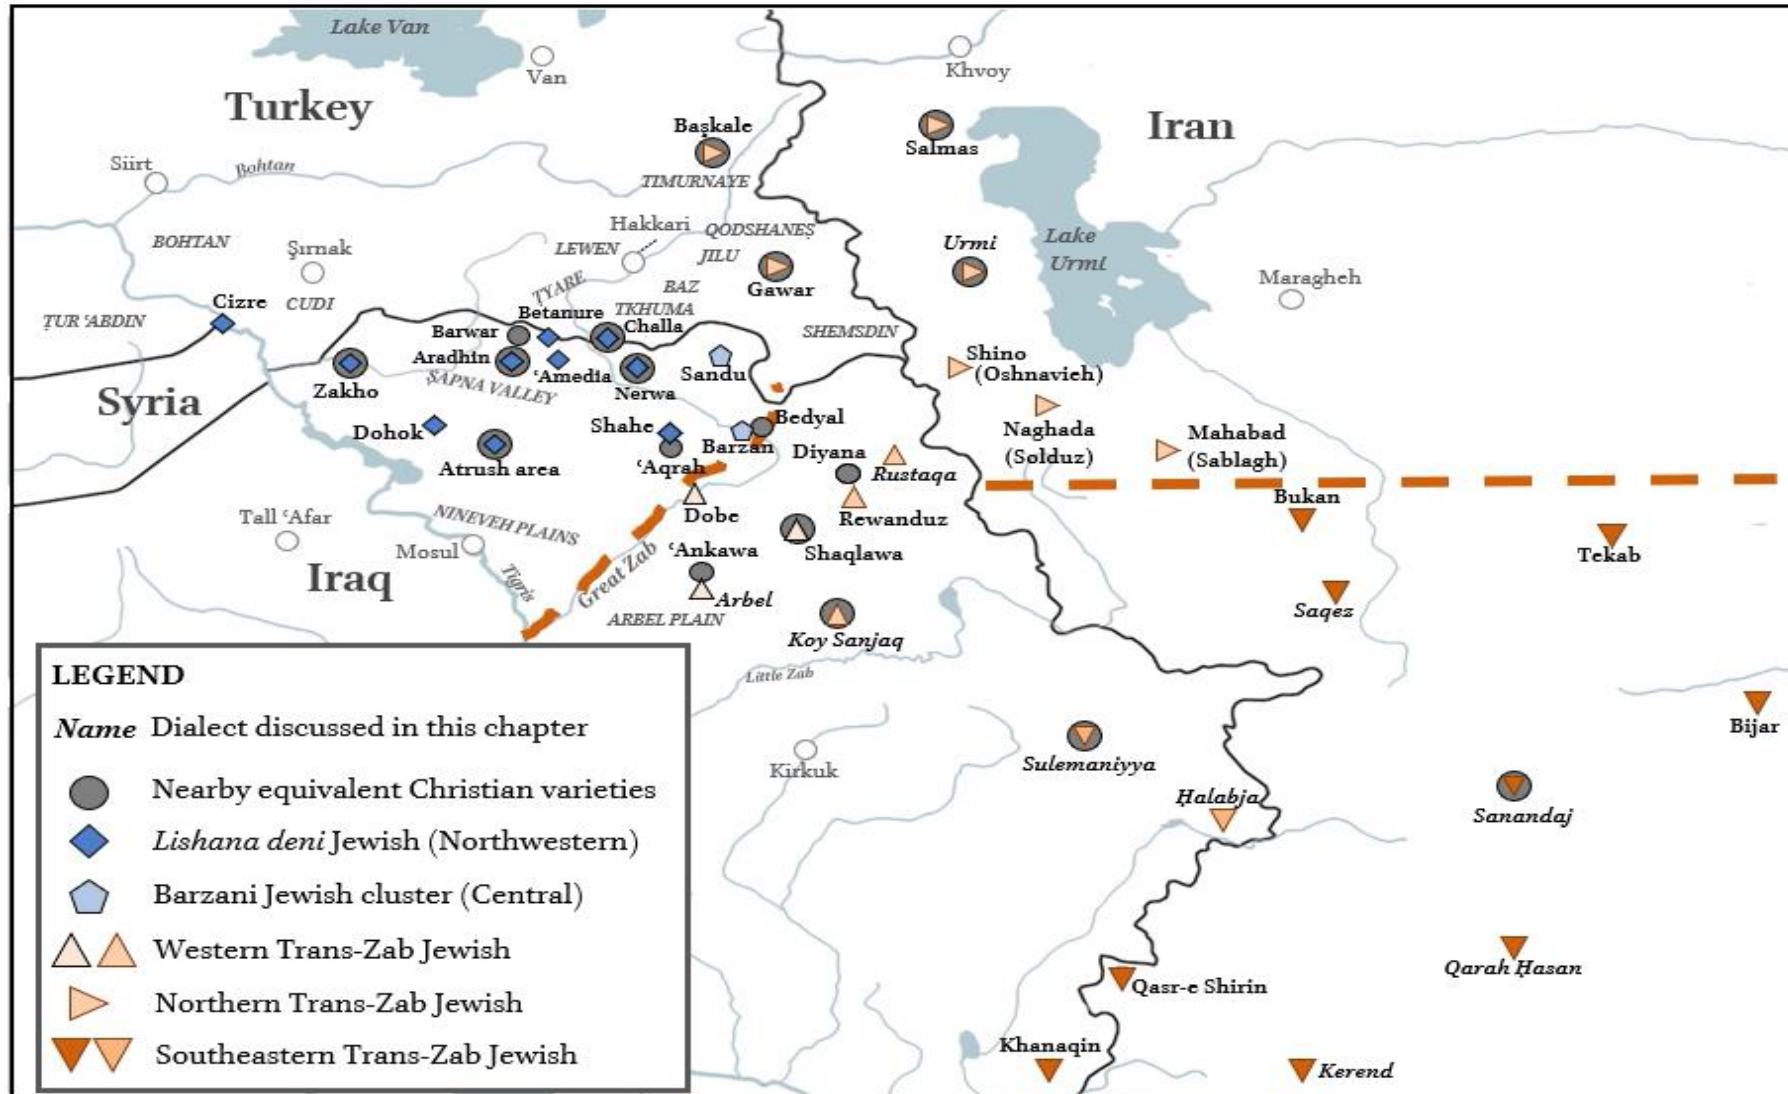

Outline of the talk

- I. What is the source of the definite suffix -ake in NENA dialects?
- II. To what extent the borrowed definite suffix has converged with the equivalent suffix in contact languages?

North-Eastern Neo-Aramaic (NENA) Dialects (Noorlander 2021)

NENA Dialects

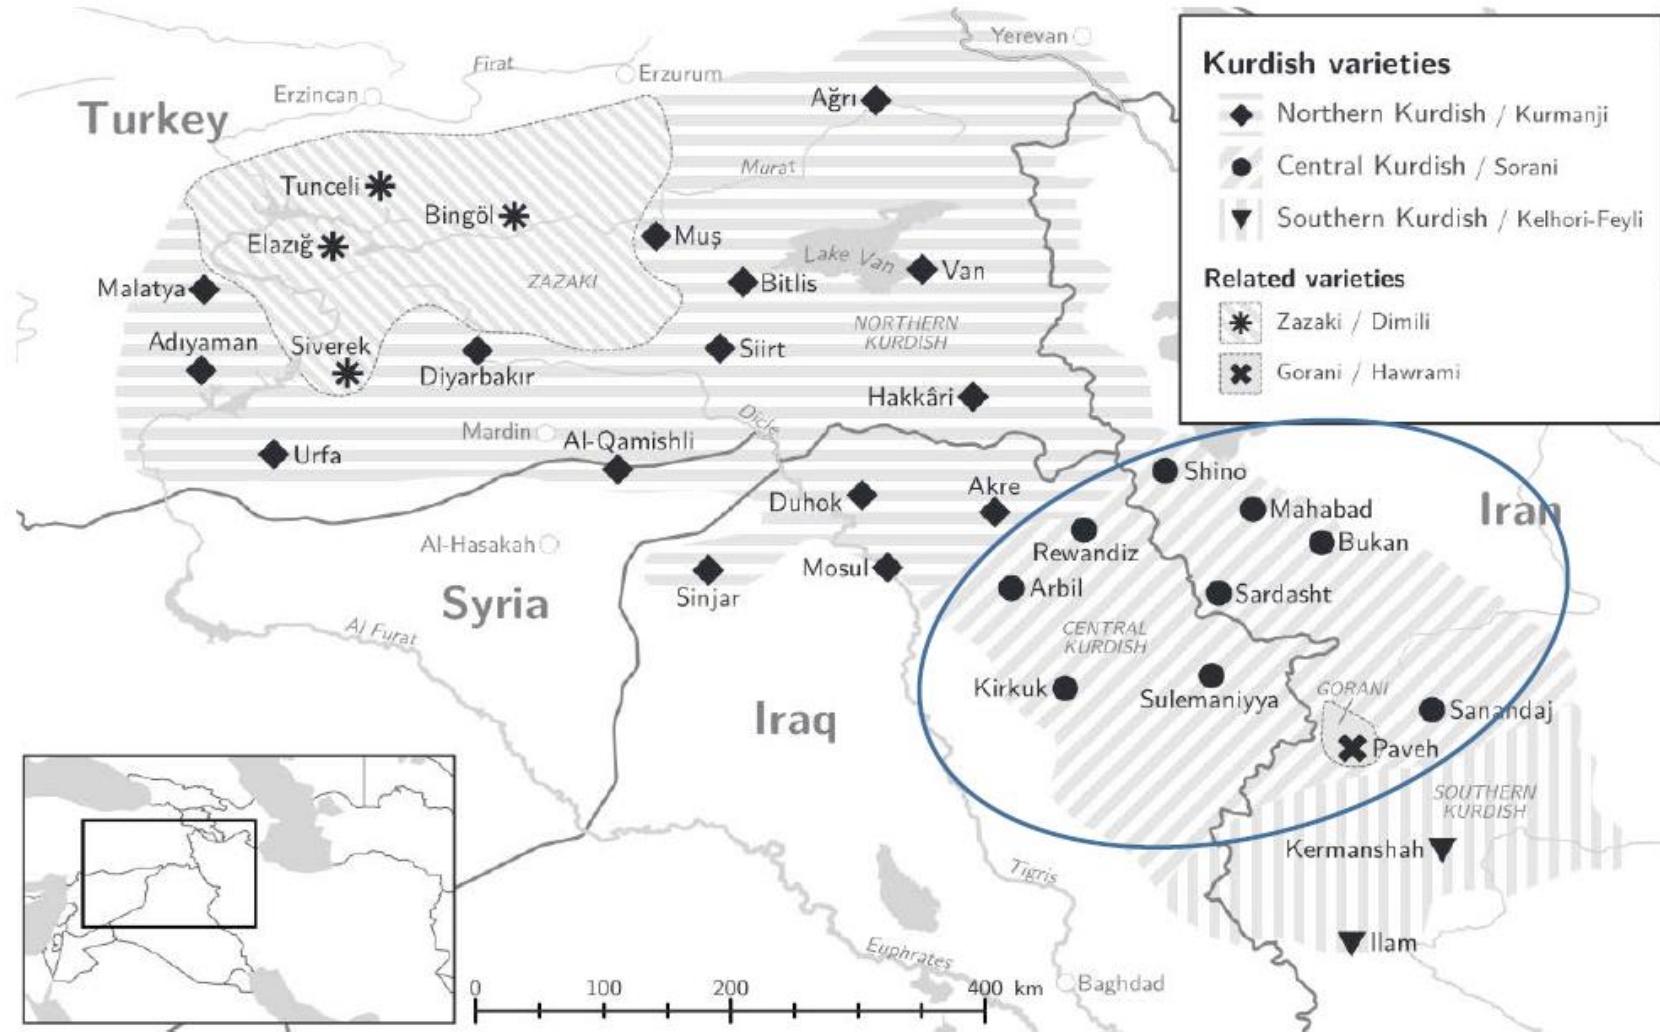

The definite suffix -ake in NENA

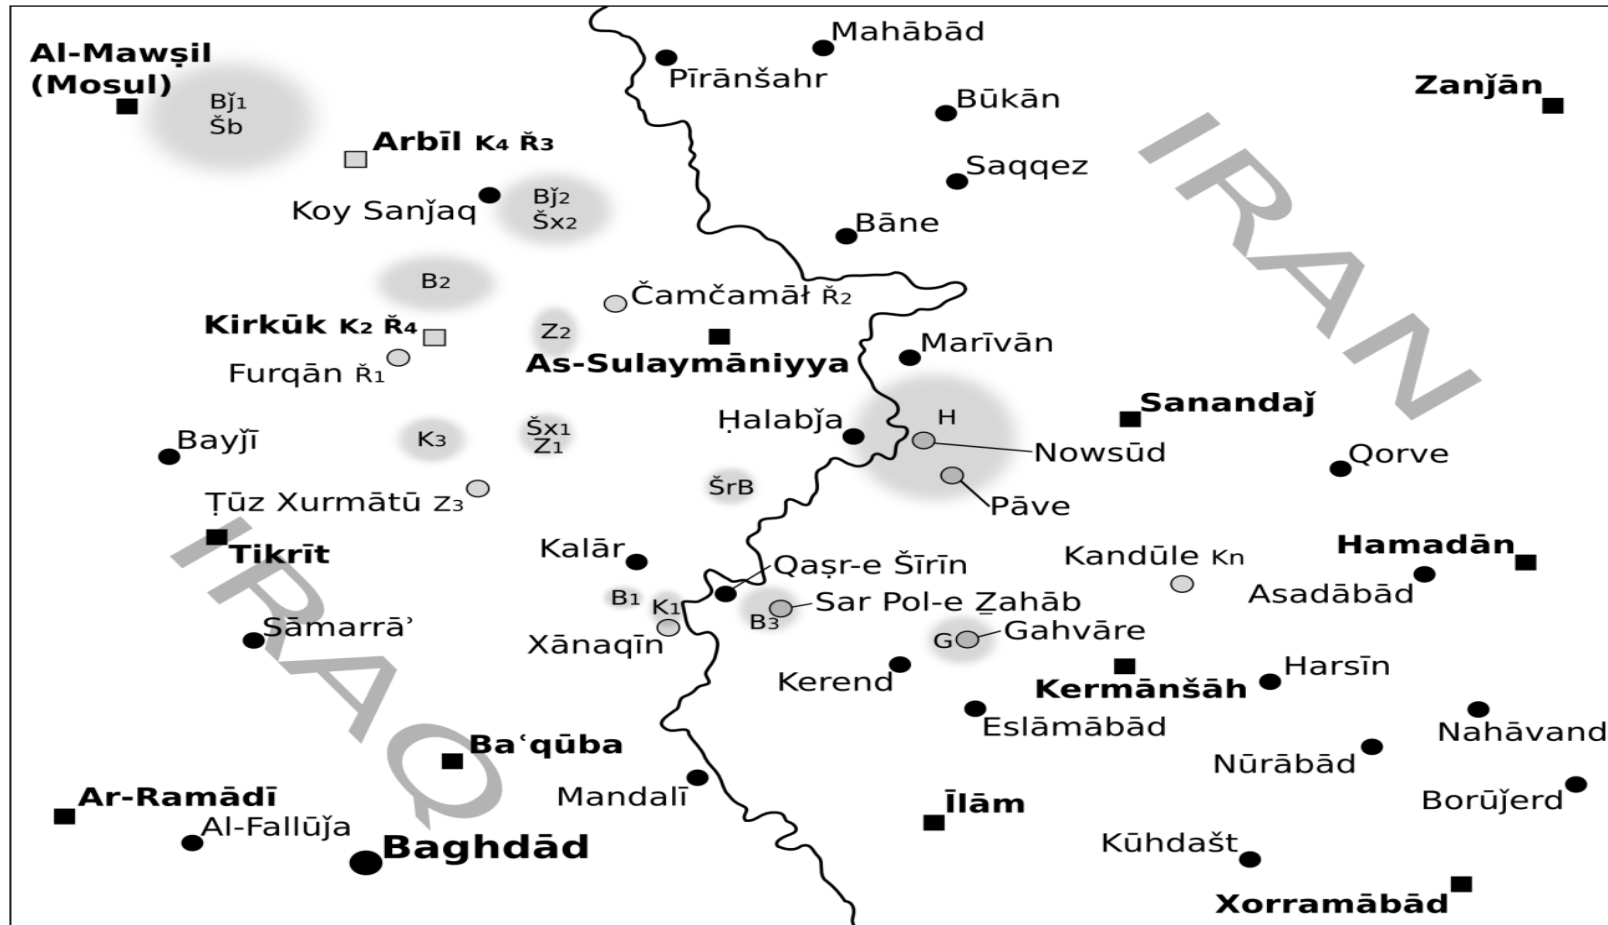

- Coghill (2019: 510):

Most NENA dialects do not consistently mark definiteness on a noun, although this function may be expressed by demonstratives (see Cohen 2012: 20-30), or (in the case of objects) by indexing on the verb (Coghill 2014). **Some eastern Jewish dialects, including Arbel, Koy Sanjaq, and SE Trans-Zab dialects, have borrowed a suffix marking definiteness from Sorani [i.e. Central Kurdish], realized in NENA as –ake, for example J. Sulemaniyya baruxa 'friend,' barux-ake 'the friend' (Khan 2007b: 201-202).**

Central Kurdish dialects (Haig 2018)

Gorani dialects (Bailey 2018:8)

It is generally assumed that there is a Gorani substrate in Central Kurdistan (cf. Christensen and Benedictsens 1921; Minorsky 1943; MacKenzie 1961; Leezenberg 1992, among others)

Paradigm of definiteness marking in Trans-Zab NENA

SG	<i>-ake</i>
PL	<i>-ake</i>

Example: Jewish NENA Sanandaj

<i>kalba</i>	‘dog’	<i>kalbāke</i>	‘the dog’
<i>kalbe</i>	‘dogs’	<i>kalbāke</i>	‘the dogs’

Paradigm of definiteness marking in Central Kurdish

Northern Central Kurdish (Mukri, Erbil, Shaqlawa)

	Direct	Oblique
SG	<i>-aka</i>	<i>-akay</i>
PL	<i>-akān</i>	

Southern Central Kurdish (Sanandaj; Suleimaniya)

SG	<i>-aka</i>
PL	<i>-akān</i>

Paradigm of definiteness marking in Gorani

	Direct	Oblique
m.	<i>-aka</i>	<i>-akay</i>
f.	<i>-akē</i>	<i>-akē</i>
pl	<i>-akē</i>	<i>-akā</i>

Paradigm of definiteness marking in Gorani

	Direct	Oblique
m	<i>-aka</i>	<i>-akay</i>
f	<i>-akē</i>	<i>-akē</i>
pl	<i>-akē</i>	<i>-akā</i>

NENA *-ake* morphologically matches the *-akē* form in Gorani, used with both singular feminine nouns and noun in the plural direct.

NENA

SG	<i>-ake</i>
PL	<i>-ake</i>

What does the token frequency of -aka suffixes in contact languages tell us about the origin of *-ake* in NENA?

Frequency is the first step toward routinization and grammaticalization (Mithun 2021)

Central Kurdish *-akay*

The singular oblique form *-akay* is probably the best candidate for borrowing; thus *-akay* becoming *-ake* due to the monophthongisation of *-ay*

The frequency of *-akay* in running texts

CK. Erbil, two tales (MacKenzie 1962)

CK Rawanduz, 1 tale (MacKenzie 1962)

CK. Shaqlawa, 7 tales (Mohammadirad *forthcoming*)

Total number of definite-marked NPs	<i>-aka</i>	<i>-akay</i>	<i>-akān</i>
146	63%	14%	23%

Possible candidates for the source of –ake in NENA

It is less likely that the source of NENA *-ake* is Kurdish *-akay*

total number of definite-marked NPs	<i>-aka</i>	<i>-akay</i>	<i>-akān</i>
146	63%	14%	23%

Possible candidates for the source of -ake in NENA

Gorani definite forms

Data: 7 narratives

(MacKenzie 1966; Mohammadirad 2020; Khan and Mohammadirad *forthcoming*)

total number of definite-marked NPs	<i>-akē</i>	<i>-aka</i>	<i>-akay</i>	<i>-akā</i>
258	42%	28%	18%	12%

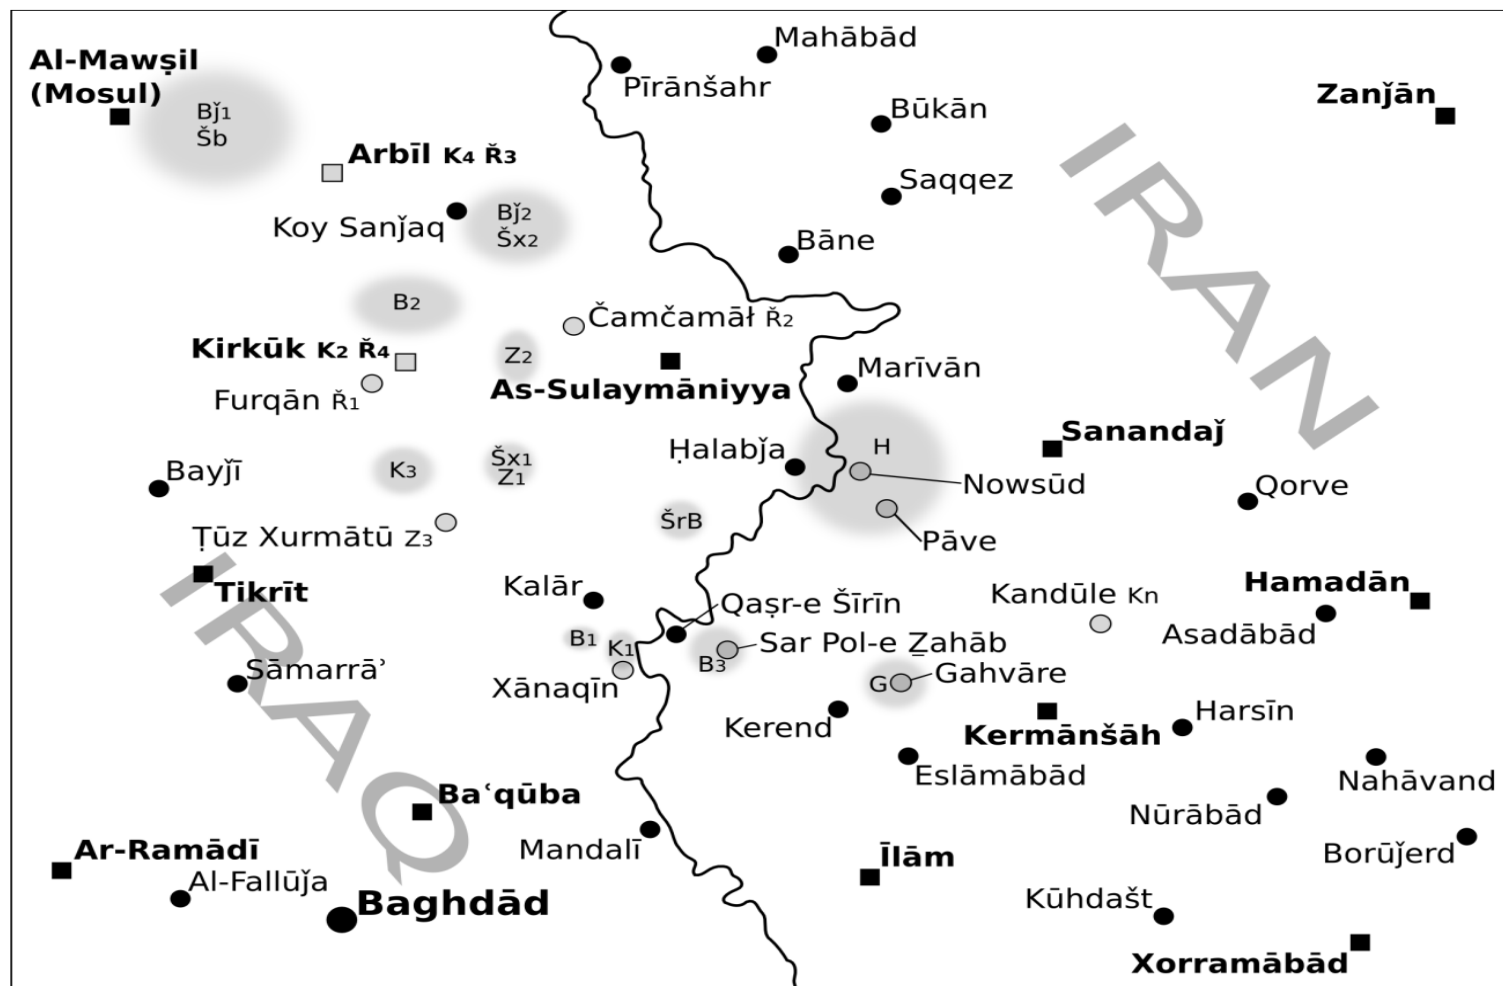

Frequency rate of different definite forms in Gorani

Data: 7 narratives

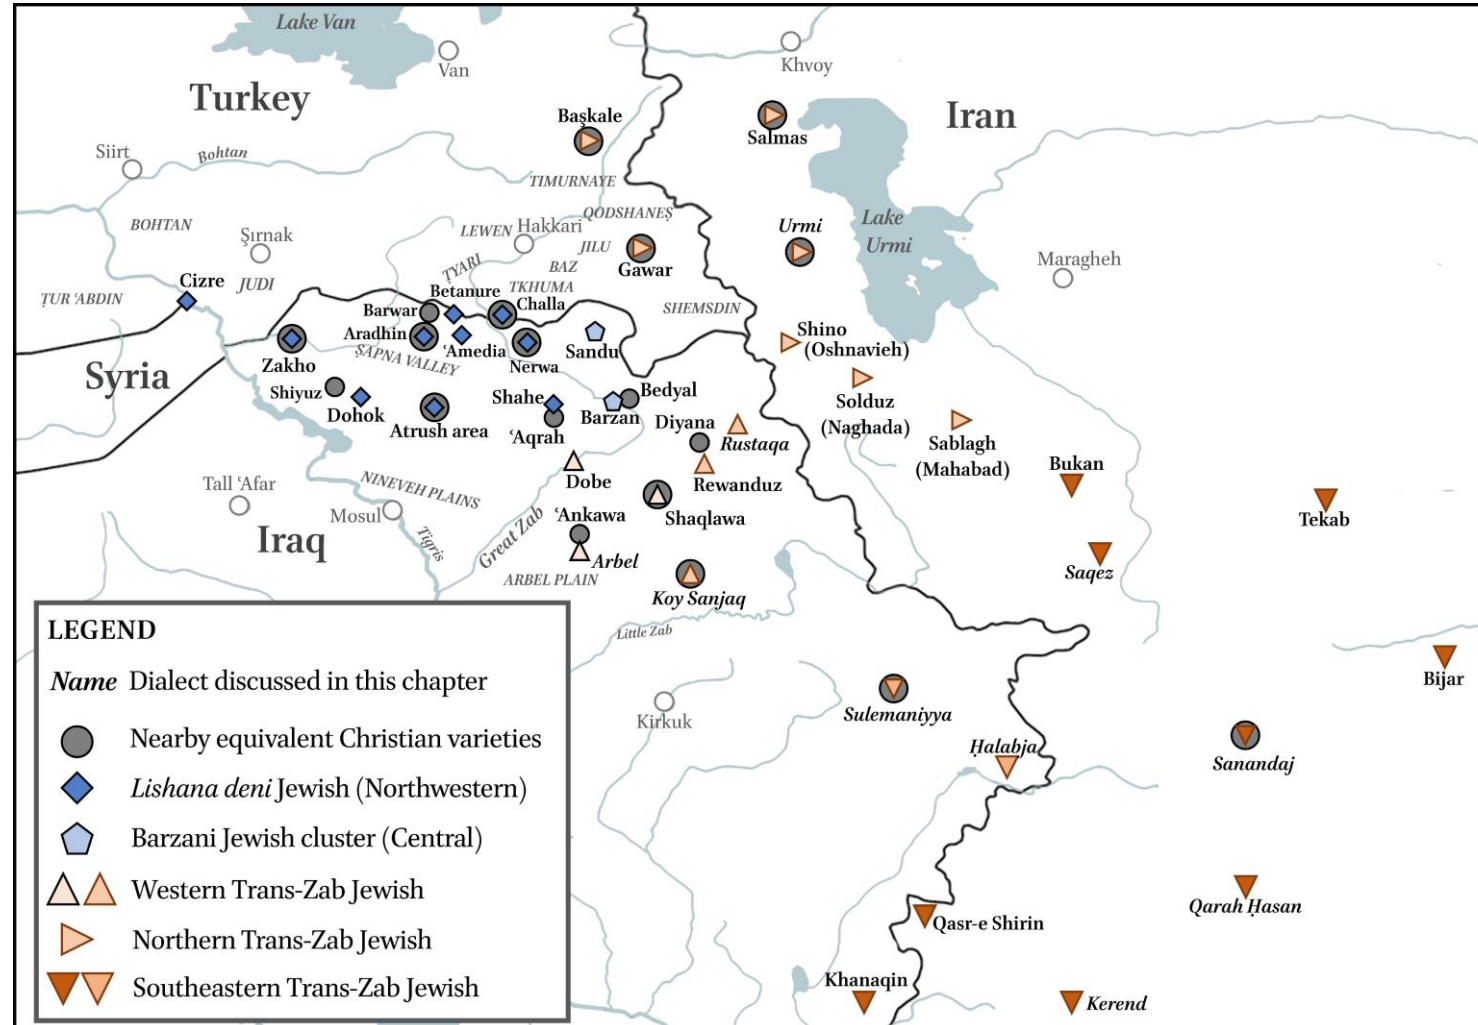

(MacKenzie 1966; Mohammadirad 2020)

total number of definite-marked NPs	<i>-akē</i>	<i>-aka</i>	<i>-akay</i>	<i>-akā</i>
258	42%	28%	18%	12%

- It is probable that NENA *-ake* was borrowed from Gorani *-akē* rather than the Kurdish *-aka*, *-akay*, suggesting that there is a Gorani substrate across NENA and that NENA borrowed the most frequent form of the definite marker.

The distribution of -ake in NENA doesn't quite match the geographical distribution of Gorani!

Morphosyntactic convergence of NENA *-ake* with definite suffixes in Iranian languages

Convergence in the morphology of -ake

- In the Kurdish there seems to be a general constraint on the exclusion of using the definite suffix with a noun that is already modified by a demonstrative form.

(1) Kurdish

<i>am</i>	<i>žən = a /</i>	<i>*am</i>	<i>žən-aka</i>
DEM.PROX	woman = DEM	DEM.PROX	woman-DEF
'This woman'			

- This restriction is observed in NENA

(2) Jewish NENA Sanandaj

<i>ʾay</i>	<i>kalba</i>	<i>/ *ʾay</i>	<i>kalb-ake</i>
DEM.PROX	dog	DEM.PROX	dog-DEF
'this dog'			

Convergence in the morphology of -ake

In the NP structure of CK and Gorani *-aka* is realized on the attribute rather than the head (cf. 1.b)

- (3) Gorani
yāna *gawra-ka*
house big-def
'the big house'

This feature is matched in NENA:

- (4) Jewish Suleimaniya
baxta *rabt-ake*
woman old-def
'The older wife'

Morphological constraints on borrowing the definite marker

In Kurdish, the form -akān can be analyzed as being composed of -aka (def) + -ān (pl), as a case of ‘debonding’ (Haig 2019):

- (5) Kurdish Erbil
- | | |
|---------------|-------------------------|
| <i>ʒən-ān</i> | <i>ʒən-ak-ān</i> |
| woman-pl | woman- def-pl |
| ‘women’ | ‘the women’ |

- In NENA, the definite affix follows the nouns which take plural suffixes other than -e

- (6) NENA Sanandaj
- | | |
|--------------------|------------------------------|
| <i>ʾăxon-ăwale</i> | <i>ʾăxon-ăwal-ăke</i> |
| brother-pl | brother- pl-def |
| ‘brothers’ | ‘the brothers’ |

Morphological constraints on borrowing the definite marker

In Kurdish, the form -akān can be analyzed as being composed of -aka (def) + -ān (pl), as a case of ‘debonding’ (Haig 2019):

- (5) Kurdish Erbil
 žən-ān *žən-**ak**-ān*
 woman-pl woman-**def-pl**
 ‘women’ ‘the women’

- In NENA, the definite affix follows the nouns which take plural suffixes other than -e

- (6) NENA Sanandaj
 ’ăxon-ăwale *’ăxon-**ăwal-ăke***
 brother-pl brother-**pl-def**
 ‘brothers’ ‘the brothers’

This reflects a lesser degree of morphological integration of the loaned suffix in the composition of the word than in Iranian.

Morphological constraints on borrowing the definite marker

- In Kurdish/ Gorani the definite suffix can be combined with a possessive suffix:

(7) Kurdish
*kič-**aka** = m*
girl-DEF = 1SG
'My daughter'

(8) Gorani
*kināč-**akē** = m*
girl-DEF.F = 1SG
'My daughter'

- In NENA, the definite suffix is not combined with possessive suffixes:

(9) NENA
brat-i / **brat-**ake-y***
girl-1SG girl-DEF-1SG
'My daughter'

Convergence in the syntax of definite -ake in NENA

- Anaphoric contexts

(10) Gorani

īsà[|] han dawlatman-ā=w mən gadā=nā[|] mən řamīyā=ū dawlatman-aka-y[|] mà-yā-ū=š panē[|]

Nowadays, there is a **rich fellow**, and as for me, I am poor. I run (i.e. work) like **the rich (fellow)** but I cannot reach him.'

(11) Jewish NENA Sanandaj

bār-d-o[|] gbéwa hezíwa zǎrá šaqlì,[|] zǎrǎké hāmènwale-o[|] ga-béla dána dána gǎbènwale,[|] tāmíz holìwale.[|]

'Afterwards they had to go and buy **wheat**, bring **the wheat** back, sort it grain by grain in the house, clean it.'

Convergence in the syntax of definite -ake in NENA

- Associative contexts

(12) Gorani

a č-î Bana-na[|] zamāwənà bē[|], zamā-(a)ka nāmē-š ‘Alī Guḷālà bē.[|]

‘In this village of Bana there was a **wedding ceremony**. **The bridegroom’s** name was Ali Gulala.’

(13) Jewish NENA Sanandaj

ʾərqála zíla tíwa ga-xa-ʾotāq.[|] ta-nóšaf tǎrǎké mázra ba-réša-nòšaf.[|] tǎra mázra ba-réša nòšaf[|] zílawa tíwa ga-dokà.[|]

‘She fled and sat **in a room**. She closed **the door** behind her (lit-erally: upon her). She closed the door behind her and went and sat there.’

Convergence in the syntax of definite *-ake* in NENA

- In some CK dialects, e.g., Sanandaj, the definite-marked NP can be combined with a demonstrative as a marker of end-weight of the discourse unit.

(14) Kurdish of Sanandaj region

mən = iš *wət = m = a* *aw* *maytār-aka-y* *tər*[|]
1SG = ADD say.PST = 1SG = DRCT DEM.DIST stable.man-DEF-EZ other

‘I said to the other stable man.’

(15) Jewish NENA Sanandaj

kmār mà honá?[|] *míri* *’āt*[|] *ba-’aqlè*[|] *sé réša* *’áy jəlè*[|] *ba-’aqlé* *’áy jəlè* *’ùčlu*[|] *’účlu* *’e-jəlǎkè*[|] *’aná-č* *’asrǎnanu*[|]

He says, ‘What should I do?’ I said ‘You go onto **the clothes** with your feet. Trample **the clothes** with your feet. Trample **the clothes** and I shall wring them out. (Khan 2009: 476)

A case of non-convergence in the functional extension of the definite suffix

- In Central Kurdish, the definite marker can be used with a subset of kin terms when they are used vocatively. These terms express endearment.

CK. Suleimaniya *pīyāw-aka* ‘husband!’ (MacKenzie 1962: 50)

CK. Sanandaj *žən-aka* ‘wife!’

CK. *dəl-aka = m* ‘Darling!’ (lit. my heart)

The definite marker has preserved its original diminutive function in these expressions.

A case of non-convergence in the syntax of definite -ake in NENA

The use of definite marker with kin term address forms is not replicated in NENA:

Jewish NENA Sanandaj *báxta!* ‘Wife!’

Jewish NENA Arbel *góra* ‘Husband!’

NENA frequently uses inherited Aramaic diminutive suffixes to express endearment in parallel constructions with kinship terms, e.g.

Jewish Sanandaj:

brona ‘son’ (< *br* + diminutive *-ona*),

’ăxona ‘brother’ (< *’ax* + diminutive *-ona*)

Summary

- NENA *-ake* is most probably borrowed from Gorani
- The borrowing of *-ake* among competing forms reflects that language contact is sensitive to linguistic items' frequency of occurrence in actual speech, and possibly their syntactic function.
- Morphologically, in NENA *-ake* occurs at the periphery of the noun.
- NENA borrowed *-ake* only in its definiteness function; *-ake* was not borrowed in its diminutive function.
“highly congruent structures” favor transfer because a highly bound morpheme is “useless in an alien system unless there is a ready function for it” (Weinreich1953:33)
